June 3 8F(Refresh Room)

June 12 Room 104

June 10 8F(Refresh Room)

June 19 Room 104

June 17 8F(Refresh Room)

[Lecture Title and Contents]

“Political Economy of Biotechnology Development and Commons”

The objective of the course is to stimulate students to apply a critical-reflexive and reconstructive approach in their own research by discussing the core concepts developed from within the practices of resistance and to show how these concepts are (can be) applied in the analysis of agro/food biotechnology development. The discussion of the core theoretical concepts for analyzing concrete practices of resisting and redesigning agro/food biotechnologies is given throughout this course. The course ends with the presentations of the students' papers about the possibilities for a *humanization of agro/food biotechnological development*.
