## Multiple Perspectives on Management

【Code: A623000】Credit: 1

Today "management" and "manager" are probably some of the most frequently used terms when describing structured/organized human interaction and are no longer confined to the world of business but cover a wide variety of spheres of activity. This course attempts to provide an overview over how and why "management" has become so widely used as a term and as a concept. Rather than imposing a single vision of management, the course looks critically at different ways to examine this important phenomenon and its expansion over time and space (drawing on research by the instructor and many others). Students are expected to (i) do some preparatory readings, (ii) participate actively in class discussions, and (iii) prepare a presentation to share some basic research about a management idea/fashion/practice.
